

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

THIS, the thirty-first annual edition of LOCKWOOD'S DIRECTORY OF THE PAPER, STATIONERY AND ALLIED TRADES of the United States and Canada, is the issue for 1906. LOCKWOOD'S DIRECTORY has always been recognized as the Standard Book of Reference in the trades it represents, and this new edition has been thoroughly revised and brought up to date.

The old departments have been enlarged and a new department, containing Grading of Paper Stock, as established by the New York Paper Stock Dealers' Association, has been added. The Statistical Information Department has been extended. The Classified Lists have been made fuller, but a reference to them should be supplemented by an examination of the mill reports, in which may be found more minute details than it is possible to present in such lists.

LOCKWOOD'S DIRECTORY is now issued in September, at the beginning of the busy season, when there is immediate necessity for the great range of fresh information that the book contains.

An examination of the Title Page and the Table of Contents will show the scope and variety of the Directory's contents; they cannot be enumerated here. The Publishers believe that in its present form LOCKWOOD'S DIRECTORY will be even more satisfactory to the trade than heretofore. They are certain that the utmost pains have been taken to make it as accurate and trustworthy as possible.

LIST OF ABBREVIATIONS USED IN THIS DIRECTORY.

S. P.—Shipping Point.

Tel.—Telegraph.

Pop.—Population.

Ex.—Express.

M. O.—Money Order.

RR.—Railroad.

(*b*)—Booksellers selling stationery.

(*d*)—Druggists selling stationery.

(*b, d*)—Druggists selling books and stationery.

(*y*)—Department stores selling stationery.

(*j*)—Jewelers selling stationery.

*Wholesale stationers.

○—Mills not furnishing reports.

BERLIN ANILINE WORKS.

Sole Importers of the Products Manufactured by the

Actien-Gesellschaft fuer Anilin-Fabrikation,
Berlin, Germany.

MAIN OFFICE
213-215 WATER STREET,
NEW YORK CITY.

BRANCHES

BOSTON, MASS.

PHILADELPHIA, PA.

CHICAGO, ILL.

CHARLOTTE, N. C.

CINCINNATI, OHIO, Mr. C. P. Calvert, Agent.

184 Pearl Street

122 Walnut Street

222 Kinzie Street

Foot C's Building

9 E. Pearl Street

MANUFACTURERS OF

ANILINE COLORS FOR PAPER MAKERS.

MAGNISIA, WATER BLUES, MANILLA YELLOWS, MALACHITE GREEN, ETHYL GREEN, NIGROSINES, ETC.

MATCHING OF SHADES A SPECIALTY.

CLASSIFIED LIST

—OF—

ADVERTISERS

IMPORTERS AND MANUFACTURERS OF

Chemicals, Colors and Dye Stuffs
FOR PAPER MAKERS.

BLEACHING POWDER,

Electrolytic and German R,

The Most Reliable Bleach Made.

Casks or Iron Drums.

CHINA CLAY.

Sulphate of Alumina.

Extra Concentrated (18 per cent. free from iron),

Ordinary (for low grade papers),

Hyposulphite of Soda,

Sugar Lead, Brown and White,

Chloride of Barium,

Bichromate of Potash.

Aniline Colors.

Anramine,
Victoria Blue,
Azurine Blue,
Soluble Paper Blues,
Soluble Prussian Blue,
Eosine,
Fuchsine,
Cherry Pink,
Green Crystals,
Brown and Violets.

WE MANUFACTURE

Orange,
Fast Red,
Carmoisine,
Scarlet.

DYEWOOD EXTRACTS: Yellow, Chrome Yellows,
Vermillions, Prussian Blue.

THE AMERICAN STATIONER

Published Every Saturday.

ESTABLISHED IN 1874.

40 TO 48 PAGES.

\$2.00 A YEAR.

TRIAL SUBSCRIPTION, THREE MONTHS FOR 25 CENTS.

THE AMERICAN STATIONER is the oldest and by far the best publication in its field, with a circulation bigger than all the rest combined.

It aims to give the Jobber and Retail Stationer just the information that will enable him to buy and replenish his stock intelligently and cheaply.

It tells all about the Standard Goods and about the Novelties in Stationery, Papeteries, Calendars, Christmas Cards, Valentines, Toys and Games, Fancy Goods and Stationers' Specialties.

It gives the Freshest News about the New Books, Magazines and Forthcoming Publications that the Stationers can sell.

It offers Practical Hints about Window Dressing, the Artistic Display of Goods, and the like.

PUBLISHED BY

THE LOCKWOOD TRADE JOURNAL COMPANY.

 Specimen Copy sent free to any address.

THE PAPER TRADE

Established
in 1872

JOURNAL PRICE,
\$4 A YEAR

PUBLISHED EVERY THURSDAY

A WEEKLY JOURNAL for Paper Makers, Managers of Mills, Manufacturers of Mill Machinery, and Dealers in Paper and Paper Makers' Supplies. Practical information regarding Paper and Pulp, Manufacture, the Chemistry of Paper Making, Illustrations of New Mechanical Appliances, and Technical Queries and Answers.

Fullest News Reports of what is going on in the Paper Trade at Home and Abroad.

The World's Commercial Intelligence relating to Mill Construction and the Paper and Allied Trades.

Financial Notes on the Money Market and the Securities in which the trade is interested.

Dependable Market Reports, with Quotations of Wood Pulp, Rags, Chemicals and all Raw Materials used in Paper Making.

A Weekly Record of Imports at and Exports from United States Ports.

THE PAPER TRADE JOURNAL far surpasses any journal in the trade, either at home or abroad, in the following particulars: In the amount of reading matter it contains; in the number of illustrated articles on the mechanical and chemical features of the art of paper making; in the fullness and completeness with which it covers the home and foreign news of the trade.

THE AMERICAN STATIONER

Published Every Saturday.

ESTABLISHED IN 1874.

40 TO 48 PAGES.

\$2.00 A YEAR.

TRIAL SUBSCRIPTION, THREE MONTHS FOR 25 CENTS.

THE AMERICAN STATIONER is the oldest and by far the best publication in its field, with a circulation bigger than all the rest combined.

It aims to give the Jobber and Retail Stationer just the information that will enable him to buy and replenish his stock intelligently and cheaply.

It tells all about the Standard Goods and about the Novelties in Stationery, Papeteries, Calendars, Christmas Cards, Valentines, Toys and Games, Fancy Goods and Stationers' Specialties.

It gives the Freshest News about the New Books, Magazines and Forthcoming Publications that the Stationers can sell.

It offers Practical Hints about Window Dressing, the Artistic Display of Goods, and the like.

PUBLISHED BY

THE LOCKWOOD TRADE JOURNAL COMPANY.

 Specimen Copy sent free to any address.

THE PAPER TRADE

Established
in 1872

JOURNAL PRICE,
\$4 A YEAR

PUBLISHED EVERY THURSDAY

A WEEKLY JOURNAL for Paper Makers, Managers of Mills, Manufacturers of Mill Machinery, and Dealers in Paper and Paper Makers' Supplies. Practical information regarding Paper and Pulp Manufacture, the Chemistry of Paper Making, Illustrations of New Mechanical Appliances, and Technical Queries and Answers.

Fullest News Reports of what is going on in the Paper Trade at Home and Abroad.

The World's Commercial Intelligence relating to Mill Construction and the Paper and Allied Trades.

Financial Notes on the Money Market and the Securities in which the trade is interested.

Dependable Market Reports, with Quotations of Wood Pulp, Rags, Chemicals and all Raw Materials used in Paper Making.

A Weekly Record of Imports at and Exports from United States Ports.

THE PAPER TRADE JOURNAL far surpasses any journal in the trade, either at home or abroad, in the following particulars: In the amount of reading matter it contains; in the number of illustrated articles on the mechanical and chemical features of the art of paper making; in the fullness and completeness with which it covers the home and foreign news of the trade.

THIS IS A SAMPLE SHEET OF
THIN RED PRESS BOARD

MADE BY

The Rogers Paper Mfg. Co.

(INCORPORATED)

SOUTH MANCHESTER, CONN., U. S. A.

We make this board in several different GRADES.

We have it in STOCK in many different SIZES, COLORS and THICKNESSES.

We make a specialty of it for THE BOOKBINDERS' and PRINTERS' TRADE, also for THE ELECTRICAL TRADE for INSULATING PURPOSES.

We furnish it together with FEEDERS for the Kitting and Wooden Mill Trade.

We also make similar HIGH GRADE BOARDS.

Orders will be gladly forwarded Paper Dealers for distribution among their customers. Write us for prices.

ARE SUPERIOR TO ALL OTHERS. ALL SIZES IN STOCK.

THE AMERICAN STATIONER

Published Every Saturday.

ESTABLISHED IN 1874.

40 TO 48 PAGES.

\$2.00 A YEAR.

TRIAL SUBSCRIPTION, THREE MONTHS FOR 25 CENTS.

THE AMERICAN STATIONER is the oldest and by far the best publication in its field, with a circulation bigger than all the rest combined.

It aims to give the Jobber and Retail Stationer just the information that will enable him to buy and replenish his stock intelligently and cheaply.

It tells all about the Standard Goods and about the Novelties in Stationery, Papeteries, Calendars, Christmas Cards, Valentines, Toys and Games Fancy Goods and Stationers' Specialties.

It gives the Freshest News about the New Books, Magazines and Forthcoming Publications that the Stationers can sell.

It offers Practical Hints about Window Dressing, the Artistic Display of Goods, and the like.

PUBLISHED BY

THE LOCKWOOD TRADE JOURNAL COMPANY.

 Specimen Copy sent free to any address.

THE PAPER TRADE JOURNAL

Established
in 1872

PRICE,
\$4 A YEAR

PUBLISHED EVERY THURSDAY

A WEEKLY JOURNAL for Paper Makers, Managers of Mills, Manufacturers of Mill Machinery and Dealers in Paper and Paper Makers' Supplies. Practical Information regarding Paper and Pulp Manufacture, the Chemistry of Paper Making, Illustrations of New Mechanical Appliances, and Technical Queries and Answers.

Fullest News Reports of what is going on in the Paper Trade at Home and Abroad.

The World's Commercial Intelligence relating to Mill Construction and the Paper and Allied Trades.

Financial Notes on the Money Market and the Securities in which the trade is interested.

Dependable Market Reports, with Quotations of Wood Pulp, Rags, Chemicals and all Raw Materials used in Paper Making.

A Weekly Record of Imports at and Exports from United States Ports.

THE PAPER TRADE JOURNAL far surpasses any journal in the trade, either at home or abroad, in the following particulars: In the amount of reading matter it contains; in the number of illustrated articles on the mechanical and chemical features of the art of paper making; in the fullness and completeness with which it covers the home and foreign news of the trade.

THE AMERICAN STATIONER

Published Every Saturday.

ESTABLISHED IN 1874.

40 TO 48 PAGES.

\$2.00 A YEAR.

TRIAL SUBSCRIPTION, THREE MONTHS FOR 25 CENTS.

THE AMERICAN STATIONER is the oldest and by far the best publication in its field, with a circulation bigger than all the rest combined.

It aims to give the Jobber and Retail Stationer just the information that will enable him to buy and replenish his stock intelligently and cheaply.

It tells all about the Standard Goods and about the Novelties in Stationery, Papeteries, Calendars, Christmas Cards, Valentines, Toys and Games, Fancy Goods and Stationers' Specialties.

It gives the Freshest News about the New Books, Magazines and Forthcoming Publications that the Stationers can sell.

It offers Practical Hints about Window Dressing, the Artistic Display of Goods, and the like.

in 1872

JOURNAL PRICE,
\$4 A YEAR

PUBLISHED EVERY THURSDAY

A WEEKLY JOURNAL for Paper Makers, Managers of Mills, Manufacturers of Mill Machinery and Dealers in Paper and Paper Makers' Supplies. Practical information regarding Paper and Pulp Manufacture, the Chemistry of Paper Making, Illustrations of New Mechanical Appliances, and Technical Queries and Answers.

Fullest News Reports of what is going on in the Paper Trade at Home and Abroad. The World's Commercial Intelligence relating to Mill Construction and the Paper and Allied Trades.

Financial Notes on the Money Market and the Securities in which the trade is interested. Dependable Market Reports, with Quotations of Wood Pulp, Rags, Chemicals and all Raw Materials used in Paper Making.

A Weekly Record of Imports at and Exports from United States Ports.

THE PAPER TRADE JOURNAL far surpasses any journal in the trade, either at home or abroad, in the following particulars: In the amount of reading matter it contains; in the number of illustrated articles on the mechanical and chemical features of the art of paper making; in the fullness and completeness with which it covers the home and foreign news of the trade.

THE AMERICAN STATIONER

Published Every Saturday.

ESTABLISHED IN 1874.

40 TO 48 PAGES.

\$2.00 A YEAR.

TRIAL SUBSCRIPTION, THREE MONTHS FOR 25 CENTS.

THE AMERICAN STATIONER is the oldest and by far the best publication in its field, with a circulation bigger than all the rest combined.

It aims to give the Jobber and Retail Stationer just the information that will enable him to buy and replenish his stock intelligently and cheaply.

It tells all about the Standard Goods and about the Novelties in Stationery, Papeteries, Calendars, Christmas Cards, Valentines, Toys and Games Fancy Goods and Stationers' Specialties.

It gives the Freshest News about the New Books, Magazines and Forthcoming Publications that the Stationers can sell.

It offers Practical Hints about Window Dressing, the Artistic Display of Goods, and the like.

PUBLISHED BY

THE LOCKWOOD TRADE JOURNAL COMPANY.

 Specimen Copy sent free to any address.

THE PAPER TRADE

Established
in 1872

JOURNAL PRICE,
\$4 A YEAR

PUBLISHED EVERY THURSDAY

A WEEKLY JOURNAL for Paper Makers, Managers of Mills, Manufacturers of Mill Machinery, and Dealers in Paper and Paper Makers' Supplies. Practical information regarding Paper and Pulp Manufacture, the Chemistry of Paper Making, Illustrations of New Mechanical Appliances, and Technical Queries and Answers.

Fulllest News Reports of what is going on in the Paper Trade at Home and Abroad.

The World's Commercial Intelligence relating to Mill Construction and the Paper and Allied Trades.

Financial Notes on the Money Market and the Securities in which the trade is interested.

Dependable Market Reports, with Quotations of Wood Pulp, Rags, Chemicals and all Raw Materials used in Paper Making.

A Weekly Record of Imports at and Exports from United States Ports.

THE PAPER TRADE JOURNAL far surpasses any journal in the trade, either at home or abroad, in the following particulars: In the amount of reading matter it contains; in the number of illustrated articles on the mechanical and chemical features of the art of paper making; in the fullness and completeness with which it covers the home and foreign news of the trade.

Art. 28. No. 1 MIXED PAPERS.—To be strictly Clean, free of Dirt and all Foreign Material and comparatively free of Strings.

Art. 29. COMMON PAPERS.—Must be comparatively Clean, Dry, and free of Tin Cans, Sticks, Ashes, Rubbish.

STATISTICAL INFORMATION

RELATING TO THE

PAPER AND PULP INDUSTRY

THE PAPER TRADE CENSUS OF 1900.

The United States Government made a special census of the paper and pulp industry in 1900. There were reported 763 establishments, an establishment being "a mill or mills owned by one individual, firm or corporation, when located in the same city or county." The summary of this census as compared with those in preceding decades is as follows:

| | DATE OF CENSUS. | | | | | |
|-----------------------------------|-----------------|--------------|--------------|--------------|--------------|-------------|
| | 1900. | 1890. | 1880. | 1870. | 1860. | 1850. |
| Number of establishments... | 763 | 648 | 742 | 677 | 555 | 443 |

*Includes proprietors and firm members, and their salaries; number only reported in 1900.

†Not reported separately.

‡Not reported.

The percentages of increase as shown by a comparison of the figures in 1890 and 1900, are as follows: Number of establishments, 17.6 per cent.; capital, 86.5 per cent.; salaried employees, 117.7 per cent.; salaries, 154.2 per cent.; wage-earners, average number, 59.9 per cent.; total wages, 57.1 per cent.; miscellaneous expenses, 50.4 per cent.; cost of materials used, 59.5 per cent.; value of products, 61.2 per cent.

The quantities, value and kinds of product are given in the 1900 census as follows:

News, 569,212 tons, \$20,091,874. Book, 351,702 tons, \$24,870,951. Fine, 112,707 tons, \$15,895,974. Wrapping, 535,252 tons, \$24,542,373. Boards, 365,617 tons, \$10,353,319. All other paper, such as tissue, blotting, building, hanging, etc., 233,103 tons, \$12,114,555. Ground Wood, 586,374 tons, \$4,433,699. Soda Fibre, 171,959 tons, \$3,612,602. Sulphite Fibre, 416,230 tons, \$10,543,291; all other products \$827,524.

IMPORTS OF BLEACHING POWDER.

For Year Ended June 30.

EXPORTS OF WOOD PULP.

For Year Ended June 30.

1898,* \$536,670; 1899, \$696,319; 1900, \$458,463; 1901, \$1,051,867; 1902, \$740,103; 1903, \$445,228; 1904, \$593,474; 1905, \$473,585.

*Not separately stated prior to this date.

USEFUL INFORMATION
FOR
PAPER BOX BOARD BUYERS.*

BASIS OF GAUGE LISTS.

The size referred to in the Gauge List is 26x38 or regular size. By dividing the *thickness of a bundle* of regular size by the *number of sheets* in the bundle, the *thickness of each sheet* is ascertained.

The regular thickness of *Bundles* of the several grades and finishes mentioned, of regular size, 26x38, is as follows:

Straw Board and Chip Board, Rough Finish, $2\frac{1}{4}$ inches=2250 thousandths or "points."

Straw Board and Chip Board, Medium Finish, 2 1-7 inches=2150 thousandths or "points."

Straw Board and Chip Board, Smooth Finish, 2 inches=2000 thousandths or "points."

Pulp Lined Straw Board and Chip Board, Rough Finish, 2000 thousandths.

Pulp Lined Straw Board and Chip Board, Medium Finish, 1900 thousandths.

Pulp Lined Straw Board and Chip Board, Smooth Finish, 1800 thousandths.

Pulp Lined Straw Board and Chip Board, No. 4 or Extra Smooth Finish, 1700 thousandths.

News Board—No. 1 or Rough Finish, 2700 thousandths.

News Board—No. 2 or Medium Finish, 2500 thousandths.

News Board—No. 3 or Smooth Finish, 2200 thousandths.

News Board—No. 4 or Extra Smooth Finish, 2000 thousandths.

Air Dried or Double Straw Board, Diamond Finish, 2000 thousandths.

Air Dried or Double Straw Board, Extra Smooth Finish, 1600 thousandths.

NOTE.—The gauge or thickness of all paper boards of a given weight can be increased by sacrificing finish, or can be diminished by extra hard calendering, the extent of such variation in thickness depending upon the character and kind of board.

To Ascertain Regular Number (basis 26x38). Knowing the thickness of a sample piece of board, divide the number of "points" or thousandths in a bundle of the same kind and finish as indicated above, by the thickness of the sample expressed in thousandths of an inch or "points," and the result is the number of sheets, 26x38 size, in a bundle, *i. e.*, the regular number.

Manilla and "White Plated" Box Boards—(solid or filled), gauge approximately one point or thousandth of an inch for each 12½ lbs. of weight in a ream, 24x36, 500 sheet basis.

TRY SCALE WEIGHTS AND NUMBERS FOR ASCERTAINING WEIGHTS AND NUM- BERS OF ROLL BOARD.

The following table shows the scale weight of a ream of 480 sheets 13x19, and its equivalent in regular number of Paper Box Board, with fractions extended three decimals.

To test the weight of board, cut a sample sheet 13x19, or one-fourth the size of a regular sheet 26x38, weigh the 13x19 sample on a paper try scale, thus ascertaining the weight of a ream of 480 sheets like the sample. Having the weight of a ream, refer to the following table to ascertain the equivalent, or regular number of the board.

| Weight of Ream of 480 Sheets, 13x19. | | Regular No. Basis 26x38. 50 lbs. | Weight of Ream of 480 Sheets, 13x19. | | Regular No Basis 26x38. 50 lbs. |

DEFINITIONS AND RULES

For Figuring Paper Box Board.

(United States Standard.)

Bundle.—A Bundle of box board is a standard package of same weighing 50 lbs. The weight of a bundle does not vary.

Number.—The "Number" of straw board indicates the number of sheets of a specified size in a bundle weighing 50 lbs.

Regular Size.—The regular or Standard Size of straw board adopted for the United States is 26x38, containing 988 square inches.

Regular Number.—The Regular Number indicates the number of sheets, 26x38 in size, in a bundle of 50 lbs.

NOTE:—When the number of straw board is specified in an order for same, and no size is given, 26x38, or the regular size, will be furnished.

Count.—By "Count" is meant the number of sheets in a bundle of 50 lbs., and the term is usually used in place of "number" in referring to the number of sheets of an odd size, or other than 26x38.

Surface in Each Bundle.—In each bundle of box board there is, for *each weight or thickness*, the same number of square inches of surface, no matter in what size sheets it may be cut. To illustrate: A regular No. 50 straw board is a bundle containing 50 sheets 26x38 inches in size; or 988 inches (surface one sheet) $\times 50=49,400$ square inches.

Thickness of Each Regular Number.—The Thickness of each Regular Number of boards is determined by and depends upon the number of square inches of surface necessary to make, with 50 lbs. of board, as many sheets 26x38 as the regular number calls for. To illustrate: In making regular No. 50 board, the stock must be made such thickness that when finished 50 lbs. will contain 49,400 square inches of surface.

Special Sizes.—Any special size desired can be cut from the web at the mills, and from the preceding statements it will be apparent that if the special size is smaller than 26x38 (or contains less than 988 square inches), there would be more sheets in a bundle; and contra, if larger than 26x38, there would be a less number of sheets. Therefore, the count of an odd-sized sheet depends: *first*, upon the thickness desired, and *second*, upon the size of the sheet.

To Determine Count of Odd Size Sheets.—If not sure of the regular number of the board desired, determine same by Gauge List. Divide the number of square inches in a bundle of the regular number desired, by the square inches in the special size sheet desired, and the result is the "number" or "count" of the special size desired.

To Determine Regular Number of Any Special Size.—Knowing the count number of square inches in a bundle of the regular number desired by the count, the result being the "surface" in the bundle. Divide the surface by the square inches in a regular sheet (26x38=988), and the result is the "regular number."

USEFUL DATA

FOR

PAPER-MAKERS

Copyrighted 1904, by Little & Walker, chemical experts and engineers, 93 Broad street, Boston, Mass.

GENERAL.

1 U. S. gallon = 231 cubic inches.

U. S. gallons \div 7.48 = cubic feet

Cubic feet \times 7.48 = gallons.

1 gallon of water at 62° F. weighs 8.339 pounds.

1 cubic foot of water at 62° F. weighs 62.355 pounds.

1 litre = 61. cubic inches = 0.0353 cubic feet = 0.2642 U. S. gallons.

Metres \times 39.37 = inches.

Inches \div 39.37 = metres.

1 square metre = 10.764 square feet = 1.2 square yard.

1 gram = 15.43 grains.

7000 grains = 1 pound avoirdupois.

28.35 grams = 1 ounce avoirdupois.

1 kilo = 2.2 pounds.

1 metric ton = 1000 kilos = 2204.6 pounds.

1 British or long ton = 2240 pounds.

1 hundredweight (cwt.) = 112 pounds.

Diameter of a circle multiplied by 3.1416 = circumference.

Diameter of a circle multiplied by 0.8862 = side of an equal square.

Diameter of a circle multiplied by 0.7071 = side of an inscribed square.

Square of diameter multiplied by 0.7854 = area of circle.

Circumference of a circle multiplied by 0.3183 = diameter.

Side of a square multiplied by 1.128 = diameter of equal circle.

Doubling the diameter of a pipe increases its capacity four times.

A struck bushel of lime weighs 72-75 pounds.

Portland cement containing over 2 % of magnesia should be rejected as inferior.

SPONTANEOUS COMBUSTION.—Oily waste has been known to ignite in 1½ hour at 170° F.

Never use animal oil or grease on rubber belts.

Leather belts should be soaked in water before oiling.

Don't use starch unless you can afford to lose 80 % of it.

1000 gallons of water dissolves 22 lbs. of sulphate of lime paper fillers.

Good retention of such fillers can therefore only be expected when they are used in considerable amount.

To convert absolutely dry fibre into air-dry on 10 % basis, divide the percentage or weight of absolutely dry fibre by 90 and multiply by 100.

SPECIFIC GRAVITY.

The specific gravity of a substance is its weight as compared with the weight of an equal bulk of water. For example, a cubic foot of wrought iron weighs about 480 pounds, while a cubic foot of water weighs 62.355 pounds. The specific gravity of wrought iron is therefore 7.7.

Hydrometers are instruments for determining the specific gravity of liquids. They are commonly marked with an arbitrary scale giving degrees. In Beaume's scale used on bleach hydrometers,

| | | |
|-------|-------------------|-------|
| 1° = | specific gravity, | 1.007 |
| 3° = | " | 1.022 |
| 5° = | " | 1.036 |
| 10° = | " | 1.075 |

In Twaddle's scale,

| | | |
|------|-------------------|-------|
| 1° = | specific gravity, | 1.005 |
| 2° = | " | 1.010 |
| 3° = | " | 1.015 |

and so on by a regular increase of .005 for each degree.

WATER, HEAT, POWER.

Hardness of water is commonly caused by lime and magnesia compounds.

The more common scale-forming constituents in water are sulphate of lime, carbonate of lime, carbonate of magnesia carbonate of iron.

Chloride of magnesia in water is especially objectionable, as it causes corrosion.

Foaming in the boiler is often caused by muddy deposits of soft scale. It may also be due to carbonate of soda in the water or in boiler compounds used.

Boiler incrustation is caused by:—

1. Deposition of suspended matter.
2. Precipitation of dissolved salts by concentration.
3. Precipitation of carbonates of lime and magnesia, as the carbonic acid which holds them in solution is boiled off.
4. Precipitation of sulphate of lime, which is less soluble in hot than in cold water.
5. Deposition of magnesia by decomposition of magnesia salts under heat.

6. Deposition of lime soaps, etc., formed when grease is present.

1-16-inch of scale is estimated to cause a loss of 13 % of fuel, and ¼-inch a loss of nearly 40 %. The presence of scale also endangers the life and safety of the boiler.

Do not use secret compounds to keep down scale. Boiler compounds should always be specially made up to suit the requirements of each water as determined by chemical analysis, and you should know what you are paying for.

The Fahrenheit thermometer is the one in common use in this country and England. The Reaumur thermometer is used in parts of Europe. The Centigrade or Celsius thermometer is used where the metric system prevails and in all scientific work.

On the Fahrenheit scale water freezes at 32° above zero and boils at 212°.

On the Reaumur scale water freezes at 0° and boils at 80°.

On the Centigrade or Celsius scale water freezes at 0° and boils at 100°. 1 atmosphere = 14.7 lbs.

1 horse-power = 33,000 foot-pounds per minute.

30 lbs. of water evaporated at 70 lbs. steam pressure per hour from feed water at 100° F. = 1 horse-power.

In tubular boilers 15 sq. ft. of heating surface = 1 horse-power. Flue boilers, 12 sq. ft.; cylinder boilers, 10 sq. ft.

Under the best conditions about 75 % of the heat developed by anthracite coals may be obtained in the steam. With bituminous coals it is difficult to obtain as much as 65 %.

The amount of heat required to raise one pound of water one degree Fahrenheit is called a British thermal unit, the abbreviation of which is B. T. U. The approximate heating powers of some typical American coals are given below, although individual lots are liable to vary from these figures:—

ANTHRACITE COAL.

| | B. T. U. PER POUND. |
|-------------------------------|------------------------|
| Pennsylvania Lehigh, egg..... | 13,975 |

SEMI-BITUMINOUS STEAMING COALS.

| | B. T. U. PER POUND. |
|-------------------------------------|------------------------|
| George's Creek, Cumberland, Md..... | 14,400 |
| Clearfield, Penn..... | 14,500 |
| New River, W. Va..... | 14,600 |
| Pocahontas | 14,800 |

BITUMINOUS COAL.

| | B. T. U. PER POUND. |
|---|------------------------|
| Dominion Coal, Nova Scotia, Cape Breton..... | 13,850 |
| Connellsville coking coal, Penn..... | 14,000 |
| Youghiogheny, Westmoreland Co., gas coal..... | 14,125 |

FORMULA FOR HORSE-POWER OF SIMPLE ENGINES.

$$\frac{A \times S \times P}{33,000} = \text{number of H. P.}$$

A = area of piston in square inches.

S = number of feet traveled by piston per minute.

P = effective pressure in pounds.

To find the area of a piston, square the diameter and multiply by 0.7854.

FARREL FOUNDRY

Ansonia,

Chilled and Dry Sand Rolls for All Purposes.

PATENTED HYDRAULIC LIFTING DEVICE.

WITH this device the machine tender, standing at base of machine, can lift the entire stack or any desired number of rolls, the time required for operating, either lifting or lowering, being but two or three seconds when operated in connection with accumulator, and but a comparatively few seconds when operated by hand pump, as in cut above; a money-saving feature when rolls become "plugged." On large machines with old style lift four men were required to perform this operation and a large amount of paper was wasted.

Made with hand-operated pump attached to housing or with accumulator, as desired. High speed machines should have no other lift. Among the users of these machines are

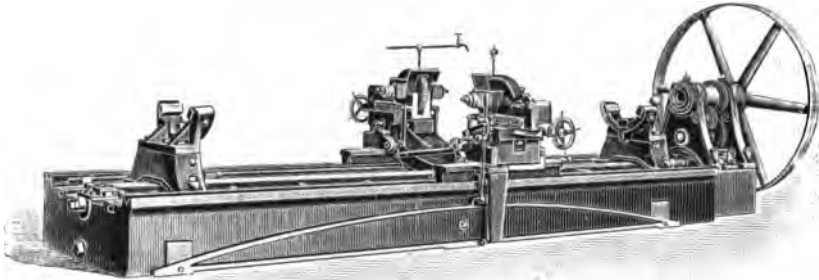

The Hollingsworth & Whitney Co.
 (nine stacks),
 The Kimberly & Clark Co. (seven stacks),
 The Great Northern Paper Co.
 (ten stacks),
 International Paper Co.,
 Piermont Paper Co.,
 The Remington-Martin Co.,
 Nekoosa Paper Co.,
